

ENERGY MANAGEMENT POLICY

1.0 Introduction

In line with the Government's commitment to improve energy performance, enhance energy conservation and reduce energy waste, Westports is dedicated to embedding sustainability through effective energy management and use of energy-efficient practices into its business strategy, processes and operations. In support of Malaysia's aspiration to achieve carbon neutrality by 2050, we are committed to continually improving energy performance and the effectiveness of the energy management system and enhancing our sustainability performance to achieve our strategic goals.

2.0 Declaration of Commitments

Westports is committed to supporting, promoting, and implementing energy management and conservation initiatives in accordance with applicable laws, regulatory requirements and other relevant requirements.

3.0 Energy Management Policy Statements

This policy aims to establish and maintain an Energy Management System ("EnMS") that serves as a framework to ensure energy efficiency, conservation and sustainability are integrated into our business decisions, operational activities and corporate culture.

Westports is committed to:

- Continual improvement of energy performance and the EnMS.
- Promoting efficient energy management.
- Promoting the reduction of our carbon footprint and carbon intensity.
- Encouraging design and innovation in energy performance improvement through green technology and sustainable practices.
- Promoting green procurement initiatives and prioritising energy-efficient products and services.
- Allocating resources and ensuring the availability of information necessary to achieve energy efficiency objectives and targets.

WESTPORTS HOLDINGS BERHAD
(Registration No. 199301008024 (262761-A))

4.0 Objectives

Westports adopts a structured framework to ensure the effective and systematic management of energy use across the organisation, to improve energy efficiency, optimise energy consumption and manage operational energy costs.

This framework provides a consistent basis for planning, implementing, monitoring and continually improving energy performance across operations. The objectives are as follows:

- To establish and maintain an EnMS.
- To conduct training and awareness programmes to foster a culture of energy conservation.
- To promote energy efficiency and reduce our energy intensity.
- To reduce carbon intensity through efficient energy management.
- To incorporate the use of renewable energy sources.
- To comply with applicable laws, regulatory requirements and other relevant requirements.
- To integrate green initiatives into our procurement practices and foster relationships with energy-efficient suppliers and vendors.

5.0 Implementation

An Energy Management Committee shall be established and will convene meetings for a minimum of four (4) times a year in accordance with its Terms of Reference.

6.0 Review and Revision

This Energy Management Policy shall be reviewed periodically to ensure its continued effectiveness, relevance and alignment with our business strategy, international standards, local laws and regulatory requirements. We will implement the necessary changes to reflect evolving best practices and prevailing regulations.

The Board of Directors approved this Policy on 29 January 2026.
